FORT MYER HEIGHTS 18 ½ MILE NEARER
the White House than Mt. Pleasant (see D. C.
maps) and is a most dangerous competitor to
that section. Why are the owners of property
in Columbia Heights and Mt. Pleasant so exercised about Fort Myer Heights? Because they
are awake to the fact that more new electric
railroads have been constructed through our section in last few years than all other suburbs
around Washington, which has brought our property in direct competition with theirs. Besides,
they realize that prices in Columbia Heights
have reached the top and offer no more attractions to the shrewd speculator, while prices in
our section are in their infancy (8c. to 20c. a sq.
ft.) and our property has a brighter future today
than Columbia Heights had when lots sold there
at our present prices. See The Star of June 20,
official information about new memorial bridge,
which will unite our property to the business
center of city. Remember, the new court house
by act of Va. legislature has recently been constructed in our subdivision. Lots are selling
right along. Get in on the ground floor, as prices
will soon be raised. Size of lots, 50x100 to 200x

NEEDED IMPROVEMENTS.

Takoma Park Citizens Discuss Water Works and Sewers. The Citizens' Association of Takema Park held a meeting at Takoma Hall last night, when the subject of water works and sewage disposal for that portion of the park in Maryland was discussed and thor-

park in Maryland was discussed and thoroughly explained to the large number of property owners and residents who were present, that they might familiarize themselves with the details and vote intelligently on the subject at the election to be held next Monday.

At the last meeting of the town council, held June 5, an ordinance was passed—in accordance with an act of the Maryland legislature passed in 1898, known as the Gould bill—authorizing an election by the people of the town to be held July 3, 1899, to determine whether or not the residents are desirous of bonding the town in a sum

The regular order of business of the association was dispensed with, and the meeting was turned over to the committee on water works and sewers. Mr. George A. Warren, chairman of the committee, stated that the reason the election held a year ago for the establishment of water works and sewer system failed to pass was because the voters were not sufficiently informed on the subject. He also explained a diagram which had been prepared, show-

Mr. Kinnear also gave the figures of a Mr. Mitchell, which were that the 21,000 feet of pipe for sewers would not exceed \$14,105. He stated that the increased rate af taxation to property owners would be but \$0.286 on the \$100.

A civil engineer from the Columbian University of Washington was present and stated that he had measured the water of the Sligo stream and found that it would furnish an ample supply for the town. He also explained the different modes of disposal of sewage.
